# SHREYA SIL

**SOFTWARE ENGINEER | BACKEND & FULL-STACK | AI-ENABLED AUTOMATION**

Bangalore, India • Relocating to Berlin, Germany on 13 December 2026

+49 155 110 32837 • shreyas.sil4@gmail.com • linkedin.com/in/shreya-sil/

**GERMAN FAMILY-REUNIFICATION VISA | EMPLOYMENT PERMITTED IN GERMANY | NO EMPLOYER VISA SPONSORSHIP REQUIRED**

## PROFESSIONAL PROFILE

Software Engineer with 5+ years of experience spanning backend engineering, full-stack development and engineering automation at Dell Technologies and Cognizant. Builds Python- and Java-based services, REST APIs and automation workflows, with hands-on experience in Spring Boot, microservices, TypeScript and React. Also develops AI/GenAI-enabled agents and analytics tools that support issue triage, developer workflows and engineering decision-making. Brings a practical, delivery-focused approach to software design, debugging and cross-functional collaboration.

## CORE TECHNICAL SKILLS

**Backend Engineering:** Java, Python, Spring Boot, Spring Framework, REST APIs, Microservices

**Frontend Engineering:** TypeScript, JavaScript, React, Redux, HTML, CSS, Webpack, Micro-frontends

**AI / Generative AI:** Generative AI, AI Agents, LLM-assisted Development, Prompt Engineering, AI-powered Automation, AI-driven Analytics

**Cloud, DevOps & CI/CD:** Docker, Kubernetes, Jenkins, GitHub Actions, CI/CD

**Databases:** MySQL, PostgreSQL, SQL

**Engineering Practices & Tools:** System Design, Distributed Systems, OOP, Data Structures & Algorithms, Git, Jira, Agile/Scrum, Windsurf, ChatGPT, GitHub Copilot

## PROFESSIONAL EXPERIENCE

**Dell Technologies** | **Bangalore, India**

**Systems Development Engineer 2** | July 2023 – Present

- Designed and developed Python-based backend automation using Dell's Atlas framework to automate repetitive server-management and operational workflows.
- Developed AI/GenAI agents to analyse technical issues, distinguish automation-script failures from manual or user errors, and support routing to the appropriate automation JIT or product JIT workflow.
- Built an AI-driven sprint analytics dashboard using historical sprint data to highlight sprint progress, potential spillover risks and engineer-utilisation patterns.
- Contributed to AI/ML-focused solutions for Dell server platforms, including performance optimisation, hardware–software integration and production readiness.
- Investigated and managed software defects through Jira, collaborating with cross-functional Agile teams to support issue resolution and delivery.
- Applied AI-assisted developer tools, including Windsurf, ChatGPT and GitHub Copilot, for code generation, debugging, refactoring, documentation and solution exploration.

**Dell Technologies** | **Bangalore, India**

**Software Engineering Intern** | January 2023 – July 2023

- Developed end-to-end Python automation workflows for Dell server validation processes.
- Collaborated with senior engineers to create reusable validation scripts across multiple server product lines.
- Analysed system performance metrics, resolved integration issues in pre-production environments and documented workflows for knowledge transfer.

**Cognizant Technology Solutions** | **Pune, India**

**Programmer Analyst** | June 2019 – July 2021

- Developed backend services using Java and Spring Boot, implementing RESTful APIs for microservices-based applications.
- Designed and optimised MySQL database schemas, improving query performance by 30% through indexing and normalisation.
- Delivered client-specific application features in line with functional and non-functional requirements.
- Partnered with frontend teams to integrate APIs and ensure reliable communication between client applications and backend services.

## SELECTED AI / GENAI PROJECTS

**AI-Powered Issue Classification Agent | Dell Technologies**

- Created AI agents to analyse technical issues and identify whether failures originated in automation scripts or from manual/user errors.
- Designed the workflow to support routing between automation JIT and product JIT processes.

**AI Sprint Analytics Dashboard | Dell Technologies**

- Built an AI-powered dashboard using historical sprint data to identify delivery risks, sprint spillovers and engineer-utilisation patterns.
- Enabled data-informed sprint planning and resource optimisation through actionable analytics.

**CoreSense: AI Workload Profiling | Dell ISG Hackathon**

- Developed an intelligent system using power and thermal telemetry to profile AI workload behaviour patterns on Dell server platforms.

**GenAI Developer Tools**

- Created LLM-based tools for code explanation, log analysis and automated documentation generation.

## EDUCATION

**Indraprastha Institute of Information Technology, Delhi** | M.Tech, Computer Science | 2021 – 2023

**St. Thomas' College of Engineering & Technology** | B.Tech, Computer Science & Engineering | 2015 – 2019

## LANGUAGES

**English:** Fluent (C1/C2) **German:** A2 **Hindi:** Native **Bengali:** Mother tongue

## ADDITIONAL INFORMATION

- Volunteer, Dell ERG Group MOSAIC – creating educational crafts for schools.
- Interests: Running, painting and badminton.
